C & System Administration

Python & Web Development

Rust & Go

NodeJS & Database Management

UI/UX Designing & Graphics Designing

EDUCATION

- **DIPLOMA IN COMPUTER ENGINEERING**

Government Polytechnic College, Perumbavoor 2022-2025

- **SECONDARY SCHOOL EDUCATION**

Christ Raj High School, Kuttipuzha

2021-2022

EXPERIENCE

- **DMRP 2019-2020**

I began my development journey by founding DMRP, short for Deluxe Mallu RolePlay, a gaming community centered around GTA. It featured servers for GTA SAMP, MTA, and GTA 4, where players could immerse themselves in roleplaying as their favorite characters. Unfortunately, DMRP shut down in 2020.

- **FALIXNODES 2019-2021**

Later, I transitioned to Linux servers and game hosting, working first as community support and then as a member of the management team at Falixnodes. Eventually, I stepped down to embark on my adventure as a freelancer.

- **PRIMESRV 2020-2021**

I worked as a Support Agent and Management Lead at PRIMESRV, a sub-brand of Falixnodes, which later shut down in 2021 due to merging back to Falixnodes.

- **PRISM 2021-???**

I launched an anime streaming and manga reading platform called Zanime in 2021, which later rebranded to Prism. It's an open-source and free-to-use project built using Next.js and Tailwind CSS.

- **PETROVM 2021-2024**

PetroVM was a mini virtual machine integrated into the Petrodactyl panel. I developed it to enable users to host multiple projects within a single Pterodactyl panel seamlessly. However, it later shut down and rebranded as Harbor.

- **ASSISTIFYAI 2023-???**

Currently, I'm contributing to AssistifyAI, a modern AI designed to enhance productivity and streamline document management with integrated AI-powered assistance, effortlessly.
